EDUCATION

San Jose State University

Master of Science in Engineering Management

Coursework: Project Management, Data Science, Lean Management, Operations and Supply Chain Management, Capacity Planning, Inventory Control, Forecasting, Data Analytics, Business Analytics.

San Jose, CA, USA

Aug 2025 – May 2027

Savitribai Phule Pune University

Bachelor of Engineering in Electronics and Telecommunication

Pune, India

Aug 2019 – Jul 2023

SKILLS

Processes: Lean/5S, Gemba, Kaizen, Six Sigma (DMAIC), Kanban, Scrum, VSM, SOPs, Spring, Supply Chain planning, Sprint Planning, JIT (just-in-time), SOPs, Data Visualization, ERP (basics), Tableau.

Programming: Python, C#/.NET, Angular, TypeScript, Java, C++, HTML, CSS.

Database: SQL (joins, validation), R, Microsoft Excel, Power BI (basic) SharePoint.

Tools: ServiceNow, GTM, Jira, Confluence, VS Code, Azure, macOS, Outlook.

WORK EXPERIENCE

Programmer Analyst - Cognizant

Oct 2023 - May 2025

- Diagnosed and resolved **12–20** client cases per sprint, using troubleshooting and attention to detail, accelerated fix times by providing technical support by inculcating the user feedback.
- Designed and delivered user stories and mock-ups for end-to-end process improvement across application environments, and saved about **2 days of extra work** each sprint by matching technical updates.
- Authored step by step guides for common problems, targeting KPI, helping new team members start doing their jobs in **1 week instead of 3 weeks**, and making sure of the ethics.
- Partnered with cross-functional teams to plan content and measure impact (traffic, engagement) and captured learnings in lightweight SOPs, to maintain compliance and incorporate ethical decision-making.
- Built a weekly report in Excel and SQL, cut reporting time from **10 to 7 hours each week**, lowered data errors from **100 to 25**, and gave teams a clear way to track process improvement through targeted key performance indicators with laid out project plans.

Omni Sports Leader - Decathlon Sports

Nov 2021 - Jan 2022

- Coordinated product marketing campaigns and managed store operations, applying market research and product management principles to optimize inventory and drive results to understand customer needs.
 - Conducted product design improvements, competitive analysis, and implemented process optimization strategies during high traffic periods of Q4 with the growth mindset.
-

PROJECTS

Anti-Theft Tracking System - Product Manager

Jul 2022 - May 2023

- Designed a low cost, compact tracking tag for valuables and individuals in crowded areas; engineered a micro controller-based prototype with GSM/LTE (12V) and recognize product lifecycle.
 - Applied end-to-end product management, from ideation to prototype (transformation), and optimized code for hardware compatibility.
-

RESEARCH & PUBLICATIONS

- Published “**Anti-Theft Tracking System**” in IJRT (“**Geo-Tracker for Mentally Challenged People by Evaluating Positioning Technologies**”) and secured copyright registration for embedded C code in the Smart Plant Watering System (automated soil-moisture irrigation).
